

CETECOM supports the customers to launch telecommunications and IT equipment and radio systems to the market. The customers are manufacturers, distributors of telecommunications equipment and radio applications and operators of communications networks as well as service providers. CETECOM tests interfaces, protocols and functionality in all fields of telecommunication and radio.

Our smart card testing laboratory is accredited by EMVCo and MasterCard for EMV level 1 and level 2 testing as well as for MasterCard PayPass Terminal type approval. The German ZKA (Zentraler Kreditausschuss) accepts test reports and results by CETECOM for the type approval of payment terminals for German electronic payment applications. As the first test laboratory world-wide, CETECOM is operating a test platform according to the ICAO ePassport standard.

The testing of electrical safety and electromagnetic compatibility and impacts of environmental effects as well as certification and support of market access complete the one-stop-shopping-offer. CETECOM ICT Services GmbH is a member of the RWTÜV Group. The world-wide CETECOM network has locations in Germany, France, UK, USA, China, Taiwan, Korea and Japan.
